The Police Department has a video system for six front-line squad cars and body cameras for 13 officers. They now have a panoramic view in the car that doubles the coverage area to capture what other wise would have occurred off screen. Any situation can be captured with multiple high-definition camera views based on the vantage point of the officer and the police car. The new cameras attach beneath officers' vests or shirts with a powerful magnet. They allow the officer to immediately attach a report number to a given situation.

The Annual Rental Properties' Inspection Program was a huge undertaking and we feel very proud that we were able to accomplish so much in our first attempt at such a program.

Here are a couple of before and after pictures illustrating how the program has already positively impacted the appearance of our village!
